

MicroStrategy Weekly Bitcoin Purchase

Polymarket × Saylor Strict Signal Analysis (v3, with Trading Strategy)

Generated: 2026-05-05
Coverage■80 Polymarket weekly markets, 2024-11 → 2026-05
Method■Only canonical Saylor signal phrases are counted (e.g. "Big/Bigger/More Orange", "Stretch the Orange Dots", "Orange Dots Matter", "It's Orange Dot Day", "Take the Orange Pill"). Generic Bitcoin commentary like "Digital Capital", "Bitcoin Standard", "BTC Yield" no longer counts as a signal.
Sources■Polymarket Gamma API + CLOB price history; SEC EDGAR 8-K filings (CIK 1050446); @saylor + @Strategy tweets (X syndication API + Nitter mirror)

Trading Strategy & Backtest

We backtested 6 trading strategies based on Saylor's tweets across 80 historical markets. Result: **the optimal combined strategy achieves 87.8% win rate with +25.6% expected return per \$1.**

Backtest setup

- **Sample:** 80 Polymarket weekly markets ("Will MSTR announce a Bitcoin purchase this week?"), 2024-11 → 2026-05
- **Resolved:** 78 (62 YES + 16 NO), 2 in progress
- **BUY signal:** Saylor posts canonical orange-dot phrase within 5 days before/during the market window (37 tweets total)
- **NOBUY signal:** Saylor explicitly says "no buys", "some weeks just HODL", "did not purchase" (8 tweets total)
- **Holiday filter:** Monday is a US federal holiday (MLK, Presidents, Memorial, Labor, Inauguration, Columbus) → 8-K pushed to Tuesday → may miss PM title window
- **Expected return:** enter at PM open price; YES win = (1-open), YES loss = -open; NO mirrored
- **"NO price" assumption:** 1 minus YES price (Polymarket binary market approximation)

Six strategies — backtest results

Strategy	Description	Trades	Win rate	Avg open	EV per \$1
F (baseline)	Always bet YES, ignore signals	78	79.5%	0.680	+11.5%
A	Bet YES on any BUY hint	50	80.0%	0.681	+11.9%
B	BUY hint + skip Mon-holiday weeks	40	85.0%	0.683	+16.7%
C	Bet NO on any NOBUY signal	14	57.1%	0.678	+24.9%
D	Combined (NOBUY→NO, BUY+non-holiday→YES)	48	81.2%	0.679	+23.8%
E ★	Strict combined (also skip mixed-signal weeks)	41	87.8%	0.675	+25.6%

Key insights

- 1. The baseline already wins 79.5%** — because MSTR buys most weeks. "Always YES" is profitable, but 5 of the 16 NO weeks open at 0.85+, causing massive losses (e.g. 2025-01-13 opened 0.88 → settled 0, -88% loss).
- 2. Add holiday filter (B) → 85.0%:** A simple "is Mon a federal holiday?" filter eliminates 3 Case B/C/D "holiday-timing traps" and lifts win rate by 5pp.
- 3. Two-sided (D) → 81.2% + 23.8% return:** Adding NO bets on NOBUY signals helps. C alone wins only 57%, but because NOBUY weeks open at high prices (PM tends to start optimistic), the expected return is positive.
- 4. Skip mixed signals → 87.8% win rate (optimal):** When Saylor tweets both an orange dot AND a HODL message in the same week, he's himself uncertain. The 5 such weeks historically performed worst — just skip.

The 5 remaining losses under Strategy E

Week	Bet	Actual	Reason
2025-03-31 → 04-07	YES	NO	"Needs even more Orange" but Q1 earnings (5/1) blackout, fake signal
2025-07-21 → 07-29	YES	NO	"72 orange dots" was retrospective, Q2 earnings (7/31) blackout
2026-03-23 → 03-31	YES	NO	"Orange March Continues" but \$42B ATM raise consumed cash, fake signal
2025-02-04 → 02-10	NO	YES	Mon 2/3 NOBUY tweet covers prior week (1/27-2/2), PM asked about current week 2/4-10
2025-11-24 → 12-02	NO	YES	Sat 11/22 "Did you HODL" but they resumed buying the following week

Concrete Trading Playbook

Operational steps (execute every Sunday 8:00 AM ET onwards)

Step 1 — Check the calendar

- Is the upcoming Monday a **US federal holiday**?
Holiday list: MLK Day (3rd Mon of Jan), Presidents Day (3rd Mon of Feb), Memorial Day (last Mon of May), Labor Day (1st Mon of Sep), Columbus Day (2nd Mon of Oct), Inauguration Day (every 4 years)
- Does the current PM market title include Tuesday? If title is "Monday-Sunday" (excluding Tuesday) → high risk
- Are we within 1-2 weeks of MSTR earnings? (Q1 typically early May, Q2 late Jul/early Aug, Q3 late Oct, Q4 early Feb)

Step 2 — Monitor Saylor's Twitter (@saylor)

Seen a BUY hint (Big/Bigger/More Orange, Stretch the Orange Dots, Orange Dots Matter, It's Orange Dot Day, Take the Orange Pill, Most important orange dot, Back to Orange Dots, The Orange March Continues, Need a bigger orange bag, Buy the Future, Send More Orange — usually paired with a SaylorTracker.com screenshot):

- If Mon is **NOT a holiday AND not in earnings blackout**: **buy YES**
- If Mon **IS a holiday**: **skip** (even if Saylor's hint is correct, PM title window may miss Tuesday's 8-K)
- If 1-2 weeks before earnings: **skip or reduce size** (MNPI blackout — company may pause buying for compliance)

Seen a NOBUY hint (No buys this week, Some weeks just HODL, Did you HODL this week?, No new orange dots this week, Ho-Ho-HODL):

- **buy NO** (open price typically still 0.5-0.7, EV +25%)

Both BUY and NOBUY in the same week:

- **skip** (5 historical mixed-signal weeks performed poorly)

Step 3 — Entry timing

- **Best time**: Sunday 8:00-8:30 AM ET (within 0-30 minutes of the tweet)
- Too late (Sunday afternoon / Monday morning): YES already at 0.95+, EV near zero
- Too early (Saturday or earlier): signal not yet posted, betting on direction is luck

Step 4 — Exit timing

- **YES bet**: Wait for Mon 8:00 AM ET tracker tweet + 8-K filing, exit when YES locks at 1.0
- **NO bet**: Wait until mid-week (Wed/Thu) confirms no announcement, exit when YES drops below 0.05
- **Stop loss**: For YES bets, if price drops -10% from open within 24 hours, consider exiting (signal may have changed)

Risk warnings

- 1. Overfitting risk**: Only 41 trades in Strategy E. Saylor's pattern may shift (e.g. switching to blue/purple dots, or changing tweet timing).
- 2. Liquidity risk**: Weekly PM volume is ~\$50K-\$2M. Large orders impact price. Suggested position size: $\leq \$5K$ per trade.
- 3. Earnings windows**: MSTR Q1 ~early May, Q2 late Jul/early Aug, Q3 late Oct/early Nov, Q4 early Feb. Reduce size 1-2 weeks before, even with a BUY signal.
- 4. Black swans**: MSTR may pause buying due to capital market freeze, regulatory changes, or Saylor's personal circumstances. Historical precedent: 2026-03-23 (\$42B ATM restructuring).
- 5. Polymarket regulatory risk**: Polymarket is geo-restricted, and USDC on/off-ramps carry compliance risk.

Strict signal profile for the 16 NO weeks

16 NO weeks categorized by Saylor strict signals. Three failure modes: fake signals / holiday timing / earnings blackout.

■ Fake signal (BUY hint but no actual purchase, not holiday-related) ■ 2 weeks ■

2025-03-31 → 2025-04-07 vol=\$777,803 [Polymarket]

Sun 3/30 BUY: "Needs even more Orange." But 4/14 8-K shows 4/7-13 was the actual purchase window (after PM closed). Q1 earnings blackout.

BUY 2025-03-30 Sun 0 ■ "Needs even more Orange. <https://t.co/lV5qgUP6oY>" [tweet]

2026-03-23 → 2026-03-31 vol=\$110,308 [Polymarket]

Sun 3/22 BUY: "The Orange March Continues." But actual 3/23-29 NO BUY (ending 13-week streak). Reason: \$42B ATM raise announced same day 3/23, capital not yet deployed.

BUY 2026-03-22 Sun 0 ■ "The Orange March Continues. <https://t.co/NRaDL5AGXV>" [tweet]

■ Holiday miss (BUY hint + real purchase, but federal holiday pushed 8-K to Tue) ■ 3 weeks ■

2025-01-13 → 2025-01-20 vol=\$414,736 [Polymarket]

Inauguration Day Monday holiday. "Buy the Future" signal was correct — 11,000 BTC actually purchased 1/13-1/20, but 8-K pushed to Tue 1/21, missing the "before-inauguration" PM title window.

BUY 2025-01-10 Fri 0 ■ "Buy the Future <https://t.co/QcYpsPRoMI>" [tweet]

2026-01-12 → 2026-01-20 vol=\$641,435 [Polymarket]

Sun 1/11 + 1/18 double BUY: "Big Orange." + "Bigger Orange." MLK Day (Mon 1/19) → 8-K pushed to Tue 1/20 → missed PM title "January 13-19" window. 22,305 BTC actually purchased, PM resolved NO.

BUY 2026-01-11 Sun 0 ■ "Big Orange. <https://t.co/VmFz8n11uq>" [tweet]

BUY 2026-01-18 Sun 0 ■ "Bigger Orange. <https://t.co/HI47hMCnui>" [tweet]

2026-02-09 → 2026-02-17 vol=\$300,777 [Polymarket]

Sun 2/8 BUY: "Orange Dots Matter." Presidents Day (Mon 2/16) → 8-K pushed to Tue 2/17 → missed PM title "February 10-16" window. 2,486 BTC actually purchased, PM resolved NO.

BUY 2026-02-08 Sun 0 ■ "Orange Dots Matter. <https://t.co/QYLQpgoWbQ>" [tweet]

■ Explicit NOBUY (Saylor said no buy, outcome matches) ■ 5 weeks ■

2025-01-28 → 2025-02-03 vol=\$377,221 [Polymarket]

Mon 2/3 explicit NOBUY tweet: "MicroStrategy did not... did not purchase any bitcoin" (covers prior week 1/27-2/2).

NOBUY 2025-02-03 Mon 0 "Last week, MicroStrategy did not sell any shares of class A common stock under its at-the-market equity offering program, and did " [tweet]

2025-02-04 → 2025-02-05 vol=\$66,856 [Polymarket]

Same Mon 2/3 NOBUY tweet. PM title was "by Wednesday" — 36-hour market opened at 0.25.

NOBUY 2025-02-03 Mon 0 "Last week, MicroStrategy did not sell any shares of class A common stock under its at-the-market equity offering program, and did " [tweet]
